DDD Journey

Apprenticeships for the aspiring software craftsman
http://www.beingtheworst.com/
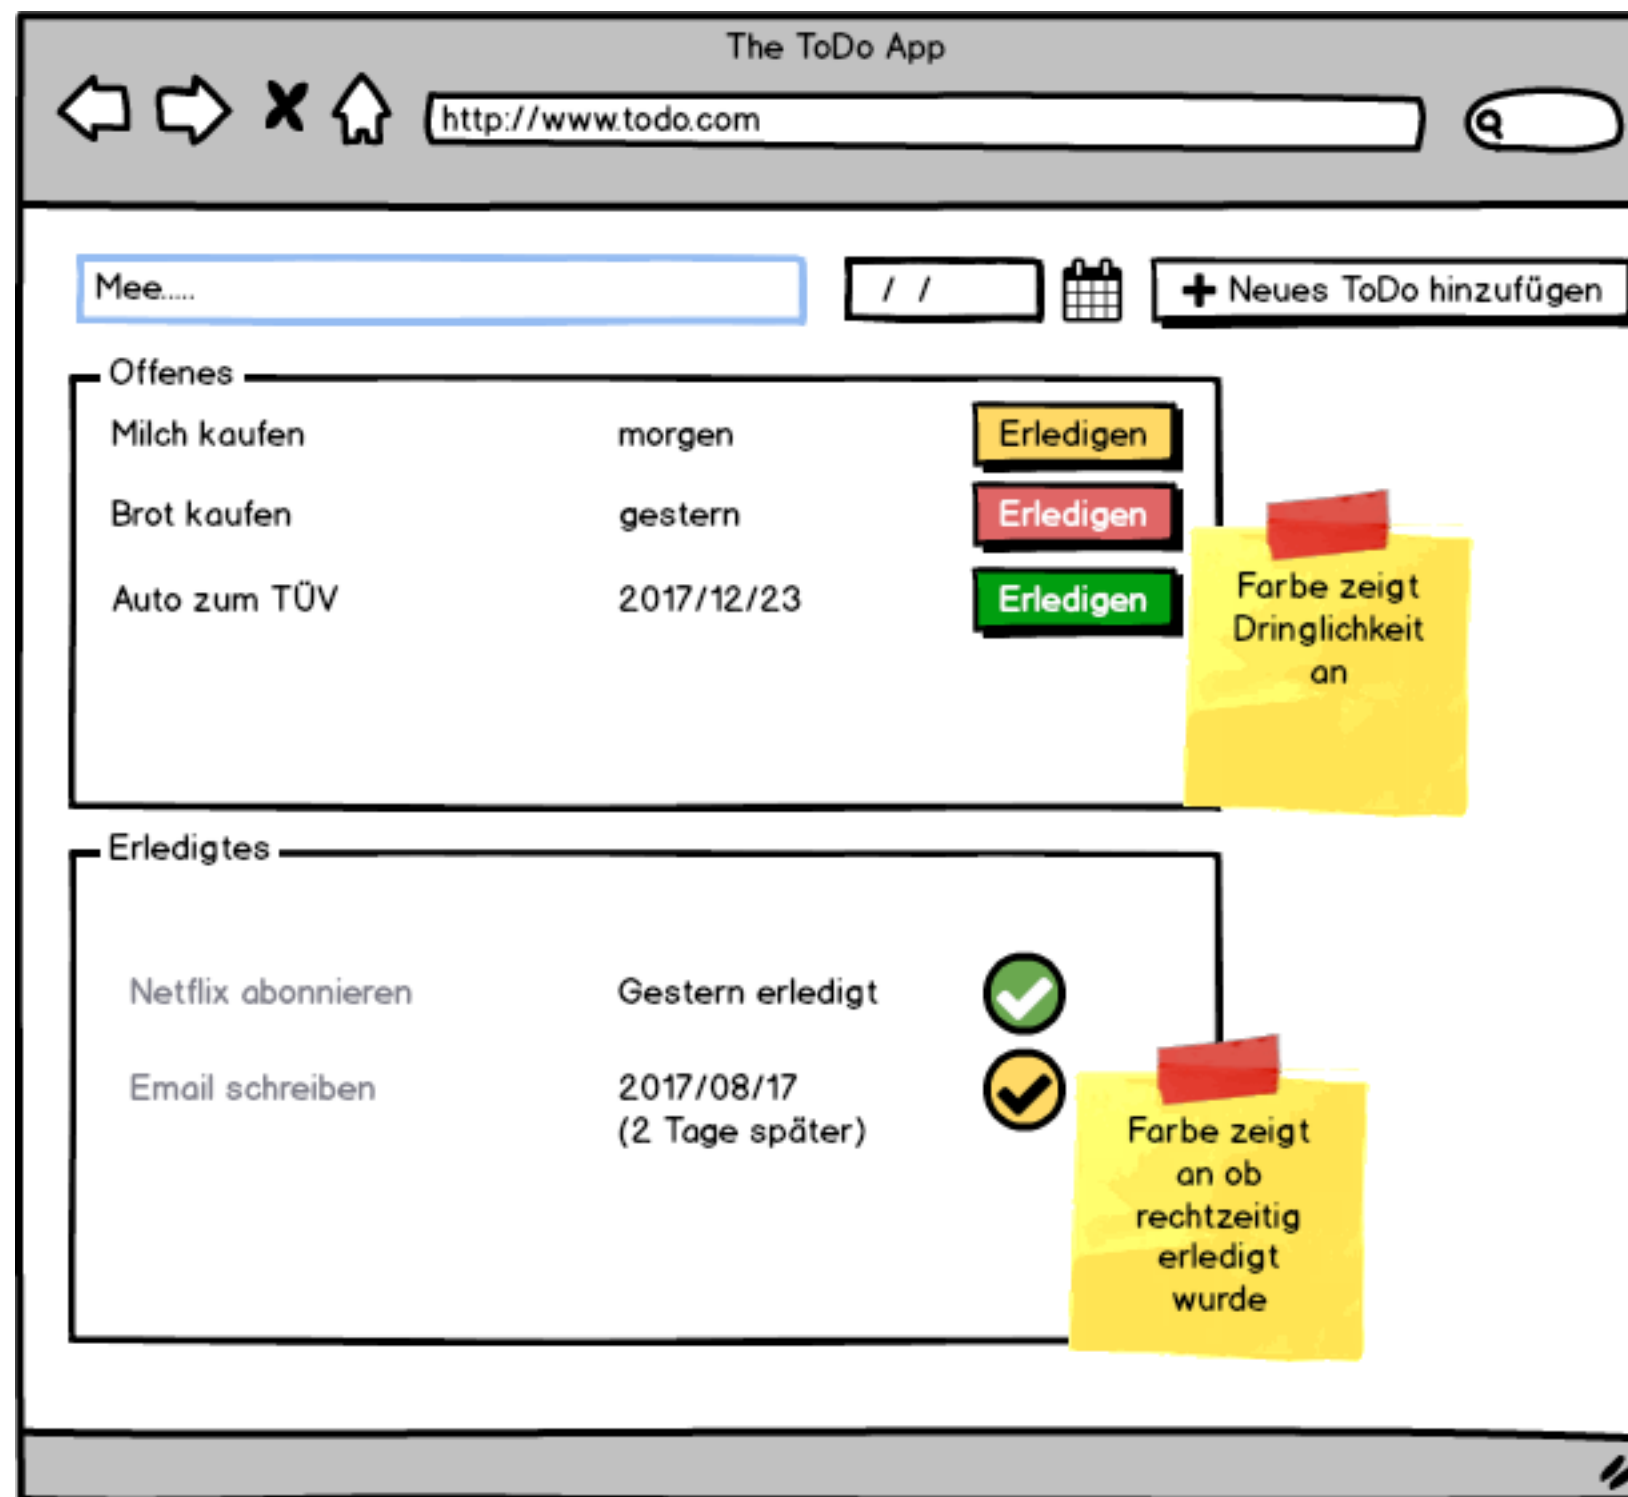

ToDo-List

Building an App

- Issue/ToDo-List as Problem-Domain

  - Extend Features step by step

- Start with simple architecture

- Apply DomainDrivenDesign

- Designing Task-Based-UIs

- Gradually evolve implementation & architecture

- (No functioning user interface - just mocks for the beginning)

No Infrastructure
Just Code

Things we might explore

- CQRS

- Event Driven Architecture (EDA)

- Event Sourcing

- Bounded Contexts

- Microservices

- Complex Event Processing / Stream Processing

Methodology

- Small guided sessions

- Pair-Programming

- Mob-Programming

- Event Storming
